

Dear Parent/Guardian

Your child's annual 2023/2024 LAIV Nasal Influenza Immunisation (Flu Spray) is now due.

All **Primary school-aged children, including children in Specialist Schools, in Reception Year to Year 6 (aged 4 to 10 years old on 31st August 2023)** will be offered the vaccine.

All **Secondary school-aged children, including children in Specialist Schools, in Year 7 to Year 11 (aged 11 to 15 years old on 31st August 2023)** will be offered the vaccine.

This vaccination programme is in place to help protect your child against flu. Flu can be an unpleasant illness and sometimes causes serious complications. Vaccinating your child will also help protect more vulnerable friends and family by preventing flu from spreading. The vaccination is free and recommended for young children and will be given by a quick and simple spray up the nose. Our immunisation team will be responsible for ensuring children receive the Fluenz Nasal Spray in schools.

Please complete the attached consent form, (one for each child at this school) detach from the letter and return the completed consent form to the school within **one week** to ensure your child receives their vaccination. **Community clinics will be available for children to access during the school holidays if they do not receive the Flu spray on the day we are in school.**

If you do not wish for your child to receive the live nasal vaccination, they can receive the injectable Inactivated Porcine-free Vaccination – the injectable vaccine is not administered in school, please contact the Immunisation Team to arrange a clinic appointment, if this is your preference.

If you have any queries, contact the School Aged Immunisation Team. Frequently asked questions and answers can be seen on the next page.

The NHS Friends and Family Survey is a way of gathering your feedback about your experience and helps to drive improvement in our service. To complete the online survey please use the following link:

<http://www.shropscommunityhealth.nhs.uk/fft-survey>.

Yours sincerely,

Debbie Jones
SAIS Clinical Team Lead

If your child becomes wheezy or has their asthma medication increased after you return this form, please contact the Immunisation Team via school on the day.

If you decide you do not want to vaccinate your child against flu, please return the form indicating **No consent**. This will help us plan and improve the service.

►► Why should children have the flu vaccine?

Flu can be a very unpleasant illness in children causing fever, stuffy nose, dry cough, sore throat, aching muscles and joints, and extreme tiredness. This can often last several days.

Some children can get a very high fever, sometimes without the usual flu symptoms, and may need to go to hospital for treatment. Serious complications of flu include a painful ear infection, acute bronchitis, and pneumonia.

►► My child had the flu vaccination last year. Do they need another one this year?

Yes; the flu vaccine for each winter helps provide protection against the strains of flu that are likely to circulate this year and which may be different from last year. For this reason, we recommend that even if vaccinated last year, your child should be vaccinated again this year.

►► How will the vaccine be given?

For most children, it is given as a nasal spray.

►► Who will give my child their vaccination?

Children aged two and three years will be given the vaccination at their general practice (GP) usually by the practice nurse.

Children in **Primary schools from Reception to Year 6** will be offered the vaccination in school.

Pupils in Secondary schools from Year 7 to Year 11 will be offered the vaccination in school

Children who attend specialist schools will be offered the Flu Nasal Spray from Reception up to their 16th birthday.

►► How does the nasal spray work?

The nasal spray contains viruses that have been weakened to prevent them from causing flu but will help your child to build up immunity. When your child comes into contact with flu viruses, they will then be less likely to get ill.

►► Are there any side-effects of the vaccine?

Serious side-effects are uncommon. Children may commonly develop a runny or blocked nose, headache, general tiredness, and some loss of appetite. This may last a few days.

The vaccine is absorbed quickly in the nose so, even if your child sneezes immediately after having the spray, there's no need to worry that it hasn't worked.

►► Are there any children who shouldn't have the nasal vaccine?

Children should not have the nasal vaccine if they:

- Are currently wheezy or have been wheezy in the past three days (vaccination should be delayed until at least three days after the wheezing has stopped)
- Are severely asthmatic and had a previous ITU admission for asthma **or** have regular **oral** steroids to control their asthma.
- Are currently being treated with oral steroids or have received a course in the previous 14 days.
- Have a condition, or on treatment, that severely weakens their immune system or have someone in their household who is immunosuppressed.
- Have severe egg allergy. Most children with egg allergy can be safely immunised with nasal flu vaccine. However, children with a history of severe egg allergy with anaphylaxis should seek specialist advice. Please check with your GP.
- Are allergic to any other components of the vaccine.

►► Does the nasal vaccine contain gelatine derived from pigs (porcine gelatine)?

Yes. The vaccine contains a form of porcine gelatine, Nasal Flu remains the most effective vaccine for this age group, however an alternative is available: Please contact The Immunisation Team on 01743 730028. **Please do not complete this form for the alternative vaccine.**

LIVE NASAL INFLUENZA CONSENT FORM 2023/24

School Aged Immunisation Service (SAIS)

Parent/Guardian to complete **both** sides please.

Phone: 01743 730028

Please return this completed form to school within **One Week**.

First Name:	Last Name:	Date of Birth:
NHS No (if known):	GP Name and Address:	School Name:
Address and Postcode:		Year:
Daytime phone number of parent / guardian:		Class/Form:

<p>Has your child been diagnosed with asthma? Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>If 'yes' and your child is currently taking inhaled steroids (i.e. uses a preventer or regular inhaler), please enter the medication name and daily dose (e.g. Budesonide 100 micrograms 4 puffs daily)</p> <p>Does your child have severe asthma that has required ITU admission or regular oral steroids, if so, has their consultant agreed to them receiving this vaccine, please give details:</p> <p>Has your child has taken oral steroid tablets because of their asthma in the past two weeks please give a date of starting:</p> <p>Please let the immunisation team know if your child has had to increase his or her asthma medication after you have returned the form or has been wheezy.</p>	<p>Has your child had a flu vaccination this flu season (since September 2023)? Yes <input type="checkbox"/> No <input type="checkbox"/></p>	
	<p>Is your child currently having treatment that severely affects their immune system. (For example; they are receiving treatment for leukaemia) Yes <input type="checkbox"/> No <input type="checkbox"/></p>	
	<p>Is anyone in your household currently having treatment that severely affects their immune system? (For example; they need to be kept in isolation or are receiving chemotherapy) Yes <input type="checkbox"/> No <input type="checkbox"/> If YES please answer questions on the reverse</p>	
	<p>Does your child have a severe egg allergy (that's required ITU treatment) Yes <input type="checkbox"/> No <input type="checkbox"/></p>	
	<p>Is your child receiving salicylate therapy (i.e. aspirin) Yes <input type="checkbox"/> No <input type="checkbox"/></p>	
	<p>If your child has any allergies, please give details:</p>	<p>If your child takes any medication, please give details:</p>
	<p>If you answered 'yes' to any of the above, please give details. Please tell us if your child has any other long-term medical conditions eg. Diabetes:</p> <p>On the day of vaccination, please let the immunisation team know if your child has been unwell or required medication such as Paracetamol (Calpol®).</p>	

Consent for immunisation for my son/daughter to receive the flu nasal spray, Complete only one box below.

<p>As the Parent/Guardian with legal delegated authority YES, I consent for my child to receive the flu Spray</p> <p>Your Relationship to the Child:</p> <p>Print Name:</p> <p>Signature:</p> <p>Date:</p>	<p>As the Parent/Guardian with legal delegated authority NO, I do not consent to my child receiving the flu Spray</p> <p>Your Relationship to Child:</p> <p>Print Name:</p> <p>Signature:</p> <p>Date:</p>
---	---

The Fluenz nasal spray is a **live vaccine** and sometimes it is necessary for young children receiving this treatment **not** to have contact with family members immediately following vaccination. Please contact the **Immunisation Team** if you require further information.

NB. The nasal flu vaccine contains porcine gelatine (derived from pigs). Nasal Flu remains the most effective vaccine for this age group, however an alternative is available: Please contact The Immunisation Team on 01743 730028.

Please do not complete this form for the alternative vaccine.

If anyone within your household is currently having treatment that severely affects their immune system (For example; they need to be kept in isolation or are receiving chemotherapy) please answer the following questions. There is a theoretical potential for transmission of live attenuated influenza virus to immunocompromised contacts for one to two weeks following vaccination.

Please state which household member is immunocompromised: _____

Has the immunocompromised person received the Inactivated Influenza vaccination? Yes No

If yes please state the date they received their Inactivated Flu vaccination: _____

Please confirm you understand the above information Yes No

If your child has an on-going medical condition not already mentioned or communication difficulties that you would like to tell us about to assist the immunising nurses, please contact the team.

GDPR For parents: This information will be shared by your child's Immunisation team for the following reasons:

1. Public Health England (PHE) to provide data to Commissioners for the immunisation service.
2. SSHIS: Staffordshire County Council's ICT department and Shropshire Health Informatics Service (SSHIS) work together to record and report data to GP's.

If you would like (further) details about the way we handle your child's information please ask for a copy of our Privacy Notice or access the Privacy Notice by going to <https://www.shropscommunityhealth.nhs.uk/content/doclib/10648.pdf>

- For Office Use Only: School Aged Immunisation Service.
